## EXPERIENCE

### Founder

Y2Z Travel

12/2022 - Present Bangalore, India

y2z.travel

I am a **Solo Founder**. Building **Y2Z Travel**, A Marketplace for travel plans with an AI powered Travel Plan engine, which creates your personalized travel plan in seconds and

- Released the **product in record time (4 months)** taking care about all the engineering, product-strategy & marketing
- Tech Stack: Ruby, Rails, Golang, Postgres, Redis, Kubernetes, Terraform, Google Cloud, AWS, Trello, Figma, Canva, HTML, CSS

### Tech Lead

OkCredit

10/2019 - 09/2022 Bangalore, India

Ledger Keeping App for SME

- Led the Team who made OkStaff (Staff management App), which was a huge success and got **100k users in 3 months**
- Led multiple teams** which created Apps like OkSales, CoWin
- Created multiple engineering modules like Reports, Experimentation, Dynamic Help, Dynamic UI. The scale of these services were **500k requests/min**
- Hired some rock stars** who were top performers in their respective teams
- Strong contributor of Ideas & discussions** at OkCredit which has **10Million+ downloads**
- Tech Stack: Ruby on Rails, Golang, Postgres, Redis, BigQuery, Pub/Sub, React, Kubernetes, Terraform, GoogleCloud, AWS, JIRA, Sketch, HTML, CSS

### DevOpsHead

Recko | A Stripe company

08/2018 - 10/2019 Bangalore, India

Reconciliation for Fintech

- Senior in the small team that built the automation platform that processes **millions of transactions in minutes** worth billions of dollars per year
- Took care of **complete infra single-handedly**, created the complete Recko Infrastructure and worked around with all the Infra (AWS, Google, Azure)
- Wrote the **ultimate Infra script** to bring a new **environment within 5 minutes**, as it was a requirement for us as we used to create an environment for every client
- Tech Stack: Google Cloud, Azure, AWS, Ruby, Bitbucket, MariaDB, MySQL, Redis, Elasticsearch, ELK Stack, NodeJS, Monit

### Senior Full Stack Developer

eLitmus

07/2015 - 04/2018 Bangalore, India

Assessment & Recruitment

- Built a competitive coding platform** for corporates
- Big MNC's loved the product** (like Oracle, Samsung, HCL) and shifted from public coding platforms to the coding platform we developed
- Wore multiple hats** Developer, QA, Product Analyst, Content & Maintainer, Coding Platform expert
- Built the CI/CD pipeline** on Jenkins later shifted to GitLab CI/CD (Which was hot then)
- Tech Stack: Ruby on Rails AWS, HTML, MySQL, CSS, GitLab, Jenkins
